Final Exam

Monday, December 3, 2007, 7:30AM to 10:00AM

This exam is closed book. Make sure your name is on all pages. Show all work, and show it in a logical and organized manner. Each entire problem is worth 20 points. You may keep this exam sheet upon leaving.

1. Find the terms up to and including the appropriate degree-5 term of the solution to the initial value problem:

$$y'' - y' = e^x, \quad y(0) = 0, \quad y'(0) = 1.$$

2. Find the terms up to and including the appropriate degree-5 term of the solution to the initial value problem:

$$xy' - 2y = 0, \quad y(-1) = 1.$$

3. In this problem, refer as necessary to the table in Figure 1. Solve problem 1 by using Laplace transforms.

4. Solve problem 1 by using the method of undetermined coefficients.

5. Solve the following problem by using methods appropriate for first-order linear differential equations.

$$y' + y/x = 2, \quad y(1) = 1.$$
